DOCUMENTS AND SOURCE MATERIAL

INDEX TO DOCUMENTS BY COUNTRY

[This index categorizes documents according to their country and year of issue, and the individual or institution responsible for issuing the document. The numbers used in the index are those allocated to the documents in the List of Contents printed above. Under each country, documents are listed as follows: government (i.e., unilateral documents officially issued by the government); joint communiqués and agreements (i.e., bilateral or multilateral government documents); institutional documents (e.g., by political parties or institutions, in alphabetical order); and finally, documents by political personalities in alphabetical order. The user seeking a particular document is advised to look for it under all possible sources of issue; it is hoped, however, that the breakdown will help researchers who already have a relatively specific idea of the source of issue of a document.]
